

Monday 15th June 2026

1. Let me upload Photo as well for the passbook
2. If I try to upload a full page screenshot of the passbook, the upload failed, this is what it said: *file 1: Anthropic request failed: 400 {"type":"error", "error":("type": "invalid_request_error", "message": "messages.0.content.0.image.source.base64.data: At least one of the image dimensions exceed max allowed size: 8000 pixels"},"request_id":"req_011Cc3N51cEg5vxstGYFXqPg"}*
3. I want to try to focus on using emails that Sony Bank sends to me every time I make a transaction as a better way to keep track of spending. I set a Label and Filter on gmail where it will get sorted into this label everytime, I want you to read emails in this label and then add it to the passbook page.
4. Native App does not let me change the frequency of Amazon S&S but web app does.

Track Costs

5. Fix this very strange white text everywhere, it is making it hard to see.
6. IOS App - Menu Bar/Navigation bar has similar text issues, its all brown and cannot see what the text is saying.
7. Amazon S&S, some of the repeat logic is not correct with repeating items, spend more time thinking about the logic
8. FYI: because my monthly amazon delivery is the 4th of every month, I would pay for that order using my money from pay from the 15th previous month. So July 4th 2026 Delivery/Order is paid by the money paid on 15th June 2026
9. Why is there no tick option for items on the budget page for every month compared to the web page?
10. Analysing the PDF's and Analysing my spending is taking way too long for Sonnet.
